GW-M60Y Precision wire arrangement Dual-station winding machine

Specification: Main technical parameters: (unit: mm)

GREWIN INDUSTRIAL GROUP CO.,LTD.

Add: The fourth floor A-A3 zone aviation business area,Dongli Distr,Tianjin,China.

Stator outer diameter	20-140mm
Stator Height	10-75mm
Number of stator slots	any number of slots according to the product
Applicable wire diameter	0.2-1.0mm(supports multi-wire winding)
Winding speed	100-600 RPM (depending on wire diameter and product)
Input voltage	220V

FEATURES:

1. The equipment can achieve precise wire arrangement, compact coils, high slot fill rate, meet the needs of high-demand winding tasks, and provide strong support for motor performance improvement and stability assurance.
2. Support multi-slot setting, can wind multiple lines in parallel, the number of slots can be set at will, to meet diverse winding requirements
3. Use 7-inch touch screen for operation, the system status and parameter settings are clear at a glance, the operation is simple, and the data is monitored in real time
4. The equipment uses motion control card and high-precision transmission system, which can save 200 sets of parameters and call them out for use, saving programming time.
